

ROAD SHOWS  
FOR ALBUQUERQUEBarnett Company Not  
Booking Attractions  
Due to High Fares

Albuquerque theatergoers have been hit hard by the increased railroad rates to be put into effect August 15. H. K. Sherman, manager of the Barnett theater, stated today that there would be no road shows booked by the Barnett company this season.

According to Mr. Sherman, Albuquerque has always been an out of the way place for shows and the money made on them was a mere trifle. With the increased rates, road show managers it is believed, are going to think hard before they take their troops into the thinly settled sections of the country.

Mr. Sherman believes that road shows which in former years have taken trips west on their own initiative or without being booked are going to be very few. Mr. Sherman said today that towns west of the Missouri river which were booking shows for winter were few. At this time last season, the Barnett company had booked 15 road shows and by the middle of last September all shows which came here in the winter had been engaged.

"There would be no use to book shows," said Mr. Sherman, "as it would not pay on present show prices and the public has paid as high for shows as it can stand. The high prices last winter caused a decrease in the number of theatergoers."

Because of this fact, Mr. Barnett has taken no steps to repair the Crystal theater on South Second street, which has been used by all road shows for several years. Theater men here believe that even where the population is thickest and where "bums" between towns are shortest the number of persons in troops will be cut down. Consequently it is believed will be fewer and the number of participants in vaudeville acts fewer.

Straight tickets are to go up 25 per cent and Pullman fares 60 per cent. The old fare here to El Paso is \$12.50 and the new rate will be \$17.00. This is said for a troop of 27 persons would mean an increase to the company of \$95.31. A jump from Trinidad here would cost even more.

RAIN NEEDED IN  
DRY LAND AREASOtherwise Conditions in  
State Are Favorable;  
Ranges Good

BY STAFF CORRESPONDENT  
SANTA FE, Aug. 18.—Crop conditions are favorable, ranges are fair to good, although some dry land districts need more rain as the result of the weather conditions for the week ending Tuesday evening. It is shown in the bulletin from the federal weather bureau. The report says:

"The first half of the week was warm, but the last half cool. Fairly general showers and thunderstorms occurred, heavy in southern localities at the close of the week. Conditions are generally favorable, but many dry land districts need rain. Harvest of small grain continues in northern counties and threshing and marketing in central. Large shipments have been made since July 1. Corn, beans, milo, kafir, and sorghums continue rapid growth and maturity, and are generally in good condition, except where rains have missed. Ranges are fair to good, much benefited by recent general showers. Stock conditions in excellent condition. Large shipments of cantaloupes are going out of southern valleys and honeydew and watermelon shipments are beginning. Cotton continues good growth, with some bolls opening. Preparation for fall seeding is under way, and some dry sown for fall pasture. Third cutting of alfalfa is nearing completion in southern districts."

Local conditions are shown as follows:

"Albuquerque—Fairly good showers and favorable weather, which have helped corn. Grasshoppers are causing considerable damage to alfalfa along the river bottoms."

"El Paso—Cotton is in excellent condition, with some bolls opening. Corn maturing nicely and good crop is indicated. Enormous crop of cantaloupes being shipped, although rains have caused a little delay. Honeydew and watermelons are coming in also. Third cutting of alfalfa continues. Good truck crops are being marketed. Showers have benefited the range."

"Roswell—First half of week hot, last half cool and closing with heavy downpour—precipitation previously deficient. Cool weather checked growth of corn a little, other crops not affected and doing well. Ranges generally rather poor over east plains, but greening up locally west of valley where good showers fell."

"Mountain—Moderate temperatures and light rains. Beans continue fair to good; corn reasonable and rains have practically assured crop. Ranges backward, but grass is starting, much rice being sown for fall pasture."

"Pueblo—Cutting of grain continues in foothills. On lower levels threshing of oats, rye, barley, winter and spring wheat is general, with yields reported good to excellent. Second cutting alfalfa completed. Corn doing well; beans fine condition; water sufficient, although ditches are not running full."

"Lakewood—Temperatures have been high and only light showers occurred. The country continues very dry and rains are needed for crops and range. Third cutting of alfalfa completed, with good yield; range drying up."

"Paris, as Laredo, was a prominent town for several hundred years before it took the name of Paris in the fourth century."

PERMANENT PHYSICAL  
RECORD OF CADETSNew Hospital Building  
at N. M. Military In-  
stitute Finished

ROSWELL, N. M., Aug. 18.—With the opening day of the New Mexico Military Institute just about a month away, all details for the next school term are being looked after and the prospects for a successful year are most flattering. Piles of letters are being received from all parts of New Mexico and from many outside states, asking for accommodations. The line-up is pretty well in hand and it will be a lucky turn for a boy who has not already been registered to get word that he will be received at the institute. In fact the school is going to be filled to overflowing and when the hand strikes up the air for the first parade across the institute grounds it is believed that every place in every company organization will be taken. Every effort has been made to extend preference to New Mexico boys and all possible information in regard to the school has been given to their parents with a view to having them enroll.

The completion of the new hospital building at the institute will make it possible this year to bring forward with more emphasis than ever the physical record department. The entire placement of the hospital is to be devoted to keeping an accurate record of the physical condition of the cadets. Appliances are being installed by means of which the exact height, weight, chest measurements and other physical facts of importance will be recorded at the opening of the school year and from time to time thereafter. As a result of the examinations the physical directors will have at hand at all times intelligent reports to guide them in directing the athletic sports and military drill, all with a view to developing a boy where he is weakest. In other words, with a card index before them the physical directors can go through the names of the boys in the cadet battalion and make an individual finding as to his physical condition. To some boys will be recommended some work in the platoon, to others hand ball, to others work in the foot ball, to others work in the gymnasium—all with a view to putting on more weight, muscle, height, or developing strength. It is absolutely impossible for a boy to stay at the military school and not participate to a great extent in athletics. Although the early morning setting up exercises and military maneuvers during the day will be sufficient for the average boy, nevertheless the required exercises are looked upon by the cadets as routine, and they are encouraged and practically obliged to get on into the open and take part in some form of active physical recreation. It is a peculiar boy who does not find in the N. M. I. some form of his favorite sport. For he will find track, tennis, swimming, baseball, football, handball, gym and almost every form of outdoor recreation designed to develop a boy's physical strength at a most important age and leading to makes him mentally alert and intellectually active.

Straight tickets are to go up 25 per cent and Pullman fares 60 per cent. The old fare here to El Paso is \$12.50 and the new rate will be \$17.00. This is said for a troop of 27 persons would mean an increase to the company of \$95.31. A jump from Trinidad here would cost even more.

## Silkolines for Comfort

—Beautiful figured Silkolines for comfort making. Come in all colors and designs including the popular Paisley pattern. If you are planning a comfort, do see these.

Redistrict National  
Forests in State  
And in Arizona

Numerous changes for the present fiscal year in the forestry service personnel have also brought about a redistricting of the national forests in New Mexico and Arizona.

Under the new arrangement, the average ranger district covers an area of 220,000 acres of national forests, with an average of 150,000 acres covered per man, there being two rangers on some of the larger districts. The largest ranger district in this district, which includes the Tusayan and Tonto forests in Arizona and the Dault forest in New Mexico covers areas of from 450,000 to 500,000 acres while the smallest district is made up of 75,000 acres.

The national forests of the southwestern district which includes Arizona and New Mexico covers a total area of 21,000,000 acres, of which 5,300,000 are in New Mexico.

The national forests in this state are but 100,000 acres less than the combined area of state controlled lands, which are estimated at 9,000,000 acres.

Officials Plan to Limit Prices Charged Consumers for Coal

WASHINGTON, Aug. 18.—Steps to limit the prices charged consumers for coal will be begun shortly by the department of justice, it is said by officials.

Reports of the federal trade commission covering costs of production and distribution of coal are being studied, it was said, and data being

compiled on which to base instructions to district attorneys governing prosecution of coal profiteering cases. No attempt will be made to fix a price, it was said, as the attorney general can only act under the Lever act, but it was pointed out that by prosecution for violations of the law the price of coal can be kept within reasonable bounds.
